

The **MS1** Folding & Inserting System -
the compact folder-inserter that offers a large
professional solution..

The complete solution to all your folding and inserting needs with our low volume system..

Professional quiet fast folding & inserting

The **MS1** is the professional choice for ease-of-use and advanced functionality.

- Folds and inserts your mail ten times faster than by hand.
- Easy-to-see and easy-to-fill with 3 feeder stations.
- 9 job memories for regular mode settings.
- Processes widely-varied inserts (like postcards, flyers, reply envelopes).

3 different fold types available.

SMALL SIZE, QUIET OPERATION, GREAT VALUE

The MS1 handles everything from card sized mailings to standard business letters and mailings. Select, fold and insert up to 5 80gsm pages into a single envelope. Three automatic feeder stations (two document and one insert station) deliver maximum flexibility. Each station can hold up to 100 sheets of paper. For non-stop operation the two document stations can be switched 'continuous' mode: each station works without interruption even when the other station is empty, enabling you to reload stations without stopping the machine.

Simple and Fast

Simply load your letters, envelopes and inserts and the MS1 automatically folds and inserts your post and seals the envelopes. Settings for recurring jobs can be stored and recalled at any time. The MS1 pays for itself even in offices that mail just 40 letters a day. Folding and inserting those letters can cost a good 30 minutes of your time, while the MS1 does the job in just a few minutes – at the touch of a button! The MS1 can fold and insert up to 1,350 letters in an hour!

Large Document Feeders (inc. A4 & A5)

- Documents up to 356 mm long (14")
- Documents in any order
- Direct loading, no stack fanning required
- Feeder swap for non-stop processing
- Re-load feeders while system is running
- Stapled sets
- Hand feed option

Specifications

System Dimensions

Length-615mm, Width: 420mm,
Height: 525mm & Weight: 40kg
