

FRANKING MACHINE

Fn Series 5

Providing a wide range of applications and a small footprint, the Fn Series 5 is ideal for medium letter volumes. Efficient, intuitive and sophisticated with a 3kg scale for maximum usability.

FRAMA Fn Series 5

CONVINCING IN EVERY DETAIL

Fn Series 5 - intuitive and progressive.
The flexible solution for modern and professional looking business mail.

Highly efficient, flexible and easy to operate

Extremely versatile to use: The Fn Series 5 franking machine provides smooth processing of your outgoing mail. Nine speed-dial keys offer absolute flexibility in processing your daily mail. With them, all relevant details can be called up at the touch of a button and used immediately. So you can always keep an eye on your postage costs and avoid incorrect franking.

The Fn Series 5 has a large feed table that allows you to easily process a wide variety of envelopes. Symbols on the keys give you quick access to frequently used functions. Optionally, you can expand your franking machine with a weighing platform for postage up to 10kg. Thanks to a high-speed LAN connection, the Fn Series 5 is always equipped with the latest tariffs and updates.

Frama AG pursues the goal of developing solutions that combine efficiency, high quality and a high degree of environmental compliance. All products and services meet international quality standards.

Product highlights Fn Series 5

All-In-One feed table

Thanks to the handy feed table with automatic letter sealer, different envelope sizes are quickly processed, sealed and franked. No more cumbersome closing of gummed envelopes!

Flexible weighing

Adaptable to individual requirements. Adding a 10 kg scale provides the facility to send parcels more easily. With Smart-Start technology, your machine is up and running faster saving you valuable time.

OLS Softwareupdates

The Frama OLS data center automatically updates, ensuring that your Fn Series 5 is always stays up to date.

ABOUT FRAMA & SERVICE FEATURES

Learn more about our company and our service

Businesses are becoming increasingly aware of the advantages of introducing digital technology into the workplace to automate many office workflows and processes.

It is our mission to help guide businesses through the digital transformation process to increase efficiencies and productivity rates as well as provide information mobility throughout an organisation.

Frama is noted for its consultative approach and ability to meet the customer's requirement by working with our customer to select the correct solutions and products ensuring we meet the customer's needs. This is what makes Frama one of the most trusted partners for business in this sector.

Frama has the ability to work with businesses and organisations of all sizes and has the flexibility and speed to meet requirements from multi-site requirements, bespoke solutions and specifically secure and efficient packages for home workers.

In today's world the risks of cyber-crime and compliance must also be considered and many legacy workflows leave organisations open to cyber fraud and non-compliance.

For more than 50 years, we have specialized in the development and manufacture of mail processing and secure data management systems. Frama has continued to innovate and to make us the solution provider for all aspects of local and international written business communication when efficiency, integrity, and innovation is required.

Automation usually follows on from the introduction of lower-level digital transformation. These might include digitising priority business processes such as HR, marketing, sales and finance. It may include ensuring email communication is secure using a unique and easy to use encryption service or the introduction of e-signature software or putting in place a basic managed print services (MPS) strategy. One of the main pillars of our approach is to ensure that any automation that is proposed is not only efficient but secure.

Our promise to you:

- Consultative approach - Ensuring you are provided with the best solution for your business needs liaising with one of our technology specialists
- Customer service - Each new member of staff is inducted through the Frama CareS programme which highlights our commitment to customer service
- Aftersales - Frama recognises that as well as providing high quality products and tailor made solutions the quality of the after sales service is a major factor when deciding on which supplier to partner with
- Service with a familiar voice - Frama provides a UK based service centre trained to the highest standards of customer care via the Frama CareS customer training modules that all staff attend at regular intervals
- Latest technology - high quality products backed by unrivalled after sales service and support. Providing a end-to-end solution for all sizes of business
- Certification - Frama is certified for IT security as per ISO 27001 and FIPS 140-2 Level 3, the highest security requirement for Cryptographic Modules
