

## FRANKING MACHINE

# Fs Series 3

The compact franking machine for flexible mail volumes. Ideal for small and medium-sized companies. Professional, essential, clever.

# FRAMA Fs Series 3

## IMPRESSIVE IN EVERY ASPECT

### Fs Series 3 - essential.

The clever solution for modern and professional looking business mail.

#### Simple to operate

Five speed-dial keys enable you to process your daily mail with impressive speed. The Fs Series 3 is always equipped with the latest rates thanks to high-speed LAN connection. Speed-dial keys provide quick access to frequently used functions at any time.

#### Exact calculation of postage value

Very simple: Place the letter on the 2kg weighing platform. The weight is automatically used to calculate the postage value. And the best thing is: Determining the correct postage costs, even for exotic shipping types, is no longer a problem thanks to the postage assistant.

#### Impress with every letter

With the Fs Series 3 you can print your personal advertising stamp on every mail. For example: Your company logo, holiday greetings or even advertising. So you can use your outgoing mail as advertising space. Impress with every letter.

#### Product highlights Fs Series 3

##### Ink-Alert

As soon as the ink cartridge reaches a critical filling level, you will be informed. This leaves enough time to re-order the cartridge or have it delivered automatically to ensure your machine is always ready to frank.

##### Compact Design

High functionality in a minimum of space. Ergonomic placement of the scale without disturbing cables. You always have tidiness at your workplace.

##### OLS Softwareupdates

The Frama OLS data center automatically updates, ensuring that your Fs Series 3 is always stays up to date

## ABOUT FRAMA & SERVICE FEATURES

### Learn more about our company and our service

Businesses are becoming increasingly aware of the advantages of introducing digital technology into the workplace to automate many office workflows and processes.

It is our mission to help guide businesses through the digital transformation process to increase efficiencies and productivity rates as well as provide information mobility throughout an organisation.

Frama is noted for its consultative approach and ability to meet the customer's requirement by working with our customer to select the correct solutions and products ensuring we meet the customer's needs. This is what makes Frama one of the most trusted partners for business in this sector.

Frama has the ability to work with businesses and organisations of all sizes and has the flexibility and speed to meet requirements from multi-site requirements, bespoke solutions and specifically secure and efficient packages for home workers.

In today's world the risks of cyber-crime and compliance must also be considered and many legacy workflows leave organisations open to cyber fraud and non-compliance.

For more than 50 years, we have specialized in the development and manufacture of mail processing and secure data management systems. Frama has continued to innovate and to make us the solution provider for all aspects of local and international written business communication when efficiency, integrity, and innovation is required.

Automation usually follows on from the introduction of lower-level digital transformation. These might include digitising priority business processes such as HR, marketing, sales and finance. It may include ensuring email communication is secure using a unique and easy to use encryption service or the introduction of e-signature software or putting in place a basic managed print services (MPS) strategy. One of the main pillars of our approach is to ensure that any automation that is proposed is not only efficient but secure.

### Our promise to you:

- Consultative approach - Ensuring you are provided with the best solution for your business needs liaising with one of our technology specialists
- Customer service - Each new member of staff is inducted through the Frama CareS programme which highlights our commitment to customer service
- Aftersales - Frama recognises that as well as providing high quality products and tailor made solutions the quality of the after sales service is a major factor when deciding on which supplier to partner with
- Service with a familiar voice - Frama provides a UK based service centre trained to the highest standards of customer care via the Frama CareS customer training modules that all staff attend at regular intervals
- Latest technology - high quality products backed by unrivalled after sales service and support. Providing a end-to-end solution for all sizes of business
- Certification - Frama is certified for IT security as per ISO 27001 and FIPS 140-2 Level 3, the highest security requirement for Cryptographic Modules
