

Maximise office productivity

DM400C™
Digital mailing system
with IntelliLink®

DM400C™ automatic digital mailing system – maximum productivity for the office environment

The DM400™ series automatic digital mailing systems bring large mailroom productivity and ease to the office environment

Every business needs to operate as efficiently as possible. Even daily, routine tasks need to be performed in a productive manner. The easy-to-use, DM400C™ automatic digital mailing system will amaze you with its simplicity and advanced capabilities.

Time saver

Fast, accurate postage re-crediting – IntelliLink® technology provides convenient, one-touch postage refills with PostagebyPhone®. Get up to 55 days free credit with the post now, pay later facility of Purchase PowerSM.

Always up to date – IntelliLink® technology provides effortless, hassle free, postal rate downloads and software updates. With IntelliLink® technology you can be sure that your equipment is always up to date.

Easy to use – all controls are fully integrated on one clear easy to use control panel with user-friendly instructions to guide the operator through each stage of processing mail.

Reduced mail preparation time – seal and frank your envelopes at the same time, resulting in a professional ready to mail document. Larger mail is quickly processed with self adhesive tape strips. Time is saved with five presets for your most commonly used jobs.

Auto-dating eliminates returned mail due to misdating– an internal clock advances the date automatically. Operators can advance the date to get a head-start on processing tomorrow's mail.

Incoming mail dating – date and time stamping capability ensures your incoming mail is handled efficiently by providing the option of recording when it arrived.

Handle rate changes easily – IntelliLink® technology allows postage rate changes to occur automatically. No need to grapple replacing a PROM chip anymore.

Digital technology is a gateway to the future –the DM400C™'s digital meter satisfies all current postal regulations, and the technology's flexibility makes the DM400C™ adaptable for the future.

The Power of IntelliLink®

The cutting-edge IntelliLink® technology contained within the DM400C™ provides an easy to use secure gateway to advanced features and services. IntelliLink® gives you access to a suite of services ensuring your system is kept current and operates at maximum efficiency. These include automatic downloads of postal rate changes and software upgrades. The DM400C™ also has the capability to download logos and envelope messaging transforming once manual processes into quick operations.

Cost saver

Correct value postage – every letter, every time

The DM400C™ can incorporate an optional 5kg integral weighing platform, freeing up desk space and guaranteeing that each letter or package bears the correct postage value. There are also options for 7kg, 12kg and 35kg interfaced weighing platforms. The optional differential weighing technology enables batches of mixed mail to be processed quickly and efficiently. The differential mail feature means that a collection of mail can be placed on the scale and the machine will calculate the correct postage for each mailpiece as it is removed from the pile.

Information management

It's crucial for businesses to account for postage expenses. Departmental or client postage spend can be easily tracked and reported with the 25 standard accounts on the DM400C™; these can be upgraded to either 100 or 300 accounts if required. Reports can either be printed or there's the option of exporting to a PC for further analysis.

Strengthen your brand with targeted and effective mailing

Transform your mail piece into eye-catching communications. Advertise your business on every mail piece with sharp inkjet printing to build your professional image. An optional feature allows you to print a return address alongside your customised envelope messaging to ensure undelivered mail is returned thus improving the accuracy of your mailing database and ultimately reducing expenditure on subsequent mail shots. These are easily entered via a built-in qwerty keyboard.

Franking discounts

With a franking machine you'll receive a discounted price compared to stamps. There's discounted prices for first and second class mail plus Recorded (Signed for), Special Delivery and International Airmail.

Specifications

Dimensions

Length	840 mm
Depth	500 mm
Height	315 mm
Weight	13 kg approximate
Speed	95 letters per minute
