The **Mail**Start Postal Franking
System - the entry level solution
that makes a big impression..

Manage all your mailing needs with our low volume postal mailing system

Instant Exact Postage with a Professional Image

The **MailStart** is the perfect franking machine for up and coming businesses, offering sophisticated features in a compact package. This flexible machine is ideal for businesses with varied letter and parcel post. No more queuing at the Post Office. No more running out of stamps when you most need them – with the **MailStart**, you'll always have the postage you need.

SMALL SIZE, GREAT VALUE

The **MailStart** combines advanced digital technology with a sleek look and compact dimensions to comfortably fit into any modern office environment. High-quality digital printing gives crisp, clean impressions and a quiet performance. The **MailStart** franks straight onto envelopes up to 8mm thick or onto self-adhesive labels on larger packages or parcels.

EXACT RATES, LOWER POSTAGE COSTS

The **MailStart** always franks the exact postage. The integrated electronic scale accurately sets the machine to the correct postage, so you save on postage costs and cut out the risk of over or under stamping. Everyday postal rates are stored in the **MailStart** 's memory, while other rates – such as Recorded Delivery – can easily be set manually. When postal tariffs change, the **MailStart** is easily updated.

MAKE YOUR MARK IN STYLE

With the **MailStart**, you'll enjoy a more business-like image – not to mention free advertising! You can customise your mail message to include your company name, special greetings, marketing slogans – even logos and photographs. There are also eight pre-set messages to choose from as well as stamp, date or message-only modes for extra flexibility.

MORE SECURITY, BETTER CONTROL

There's no need for loose stamps or petty cash required to buy them when you use the **MailStart**. The machine can be fully locked and is pin protected, so only authorised users can use it. You can check usage with a printed report when required.
