New tariff download Instructions

New Mailmark Postal Tariff & Services – rate change 25th March 2019

Your Mailcoms Mailstart+ franking machine uses the Mailmark Postal Tariff and prints a frank as shown in the image here.

Your machine needs to be updated with the latest Royal Mail products, services and rates. You will need to follow these steps to download and install the updates to your machine. The new tariffs will become available to download from **1st March 2019**. The new tariffs will be held in memory and will activate automatically on the **25th March 2019**.

Note: If you have recently added postage or completed a data upload after 1st March your machine may have already downloaded the new rates files. You can check this using the tool on the dedicated website www.pitneybowes.com/uk/ratechange.

Your download instructions:

Note: If you use a lock code, you will need to enter it during this update.

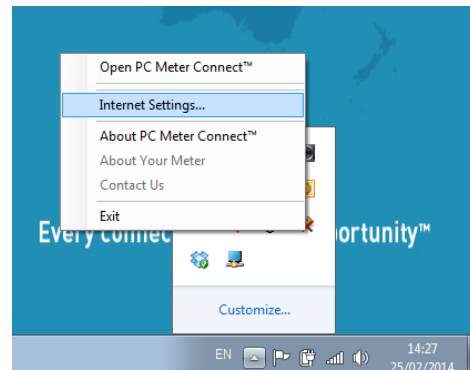

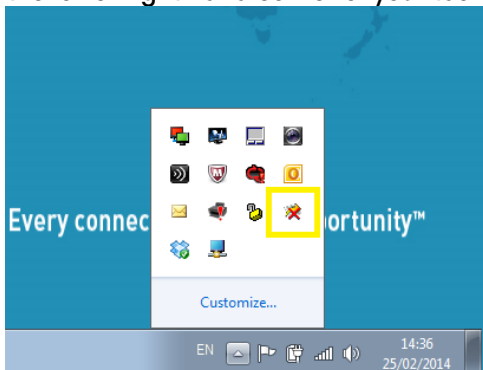

1. Check that your system is connected as for a normal postage refill.
2. At the main screen (Date on display) press the **'Funds'** key.
3. Use the review **'down'** key to scroll to **'Check balance available?'**
4. Press the **'Yes/Enter'** key.
5. The machine will automatically connect to the PB Infrastructure.
6. Once the meter has connected it will show **'Checking PBP Account Balances'**.
 - The machine then shows **'Prepaid £xx.xx'** (the balance of your PBP account).
7. Press the **'Yes/Enter'** key to continue.
8. The meter then asks if you wish to Refill Postage. Press the **'No'** key to continue.
9. The meter will check for updates and display **'SYSTEM UPDATE REQUIRED – Please Wait'**.
10. Press the **'Yes/Enter'** key to download and install the new rates.
11. Once completed the display will read **'Download complete Continue – press enter'**
12. Press the **'Yes/Enter'** key.
13. The display will then show **'During the call: Rate data installed'**
14. Press the **'Yes/Enter'** key.
15. You will be asked **'Do you want to print a download report?'**
16. Press the **'No'** key.
17. The machine will then return to the main screen. The new rates are now installed.

NOTE: If you advance the printing date to 25th March 2019 or beyond, this will activate the new Postal Rates and cannot be reversed.

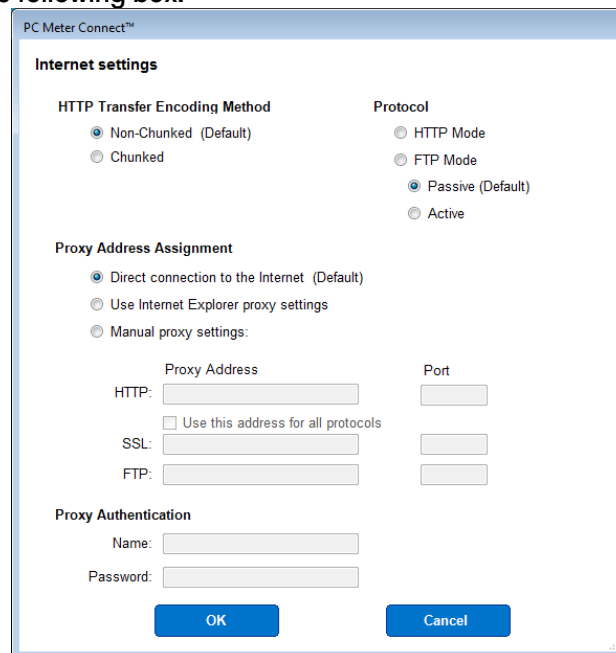

Troubleshooting (For PC Meter Connect Users)

If you experience “Software Download Failed” when trying to download the rates software using PC Meter Connect via your computer, you can attempt to resolve this issue by adjusting the “Internet Settings...” option.

1. Right click on the PC Meter Connect icon on the lower right hand corner of your taskbar.
2. Now **left** click on Internet Settings.

3. You will then see the following box:

A screenshot of the 'PC Meter Connect™' Internet settings dialog box. The dialog has a title bar and a close button. It contains several sections: 'Internet settings' with 'HTTP Transfer Encoding Method' (radio buttons for 'Non-Chunked (Default)' and 'Chunked') and 'Protocol' (radio buttons for 'HTTP Mode', 'FTP Mode', 'Passive (Default)', and 'Active'); 'Proxy Address Assignment' (radio buttons for 'Direct connection to the Internet (Default)', 'Use Internet Explorer proxy settings', and 'Manual proxy settings:'); 'Manual proxy settings' with input fields for 'Proxy Address' and 'Port' for 'HTTP:', 'SSL:', and 'FTP:', and a checkbox 'Use this address for all protocols'; and 'Proxy Authentication' with 'Name:' and 'Password:' input fields. 'OK' and 'Cancel' buttons are at the bottom.

Alter the settings to suit your PC / network.

The best place to start is to change from the default FTP selection to the HTTP Mode radio button on the Protocol choice (see top right). Confirm this by selecting OK. Now attempt the download again on your meter.

Also, try altering the HTTP Transfer Encoding Method from Non-Chunked to Chunked (or vice-versa) or the FTP Mode from Passive to Active (or vice versa).

There are no real hard or fast rules here as each PC / IT configuration may differ from one user to the next so it is a case of altering the settings to what works for you.

For any further advice, please contact your IT administrator who may be able to give you the specific settings required for your PC / network.
